

# Boost Your Energy Score & Transform Your Home

Investing in home performance is investing in a more comfortable home that works better. Your utility bills will be lower, and your home will be more attractive to buyers down the road.

Enhabit and our certified building science experts are your trusted partners for home energy improvements big and small. Whether your home's energy score is a 1 or a 10, we're here to help transform your home into a better place to live.

## COST-EFFECTIVE HOME PERFORMANCE UPGRADES

From windows to thermostats, opportunities abound to improve how your home performs. These cost-effective investments can boost comfort, lower utility bills, enhance your home's resale value and many come with utility incentives.

- ✔ **Insulation:** Air sealing and insulation reduce heat loss and offer the most comfort for the cost.
- ✔ **Energy-efficient windows:** Hot and cold air escaping through windows can boost your energy bill. Keep your home warm or cool with highly insulated windows, storm windows or interior window inserts.
- ✔ **Duct sealing:** Sealing the ducts that run through attics, crawlspaces and garages can cut energy waste and heating costs by 20 to 30 percent.
- ✔ **Water heaters:** Heating water accounts for 15 percent of a home's energy use. A more efficient water heater will save you money and energy.
- ✔ **Heating and cooling:** A high-performance system can make a big difference, especially if yours is more than 15 years old or powered by oil.
- ✔ **Smart thermostats:** Highly programmable, some even adjust the temperature automatically based on your habits, lowering energy use.

## THE ENHABIT DIFFERENCE

Ready to get started? We'll work with you to recommend cost-effective upgrades, design home performance projects, connect you with qualified contractors and more.

Reach out today to take the first step toward a more comfortable, efficient home.
